## God is one and unique

God is one and only one. The unique concept of God is known as believe of God. Believing to the Supreme power may be God or the Supreme. God does not physically exist, but believe of God exists within the heart of most of the people of the Universe. It is the uniqueness of God.

'Unique' attribute is used to characterize the God. You may think that all units of measurements are unique as examples of cm(centimeter), gm(gram), sec(second) in CGS system, like that concept of God is unique which can't be fragmented, segregated as because it is universal truth. 'Believe' is a fundamental issue which is learnt through long learning process of family and from formal or non-formal institutes. It is a state of brain which has come to 'Believe' state through some input data.

God has multiple names as Jesus, Allah, Bhagavan, Iswar, Budhah, Brahma, Bishnu, Siva etc. Different religious people call God by different names. Whenever prayer and worship performed by anyone calling by any names of God the emotion is same and that is surrender to the Power of the Supreme. This philosophy has the maximum effect of the mind and soul of the human that 'I am not the all mighty person, someone in the Up observes all'. A fear is generated to do any evil. So, anybody may call the God by any name but purifying process to the mind is the same.
